Profile Summary

I am a motivated software engineering undergraduate with a strong passion for building innovative and practical software solutions. I actively seek opportunities to enhance my skills and gain hands-on industry experience. Known for my problem-solving mindset and attention to detail, I excel at tackling complex challenges and delivering efficient, high-quality results. My goal is to apply my technical knowledge to create meaningful impact through real-world applications.

Education

Bachelor of Science (HONS) in Software Engineering

2022

University of Kelaniya

Current GPA: 3.40

Physical Science

G.C.E.A/L 2021

BT/KK/ Chenkalady Central Collage

Combined Maths: B | Physics: A | Information Communication Technology: A

Technical Skills

Programming languages

JavaScript, Java, PHP, C

Frameworks & Technologies

React JS, Springboot, Bootstrap

Databases

MySQL

Cloud Services

Amazon Web Services (AWS)

Tools

Git/Github, Postman

Soft Skills

problem-solving, Strong analytical abilities, Team-oriented with a collaborative mindset, Quick to adapt to new tech, Good communication, Skilled in troubleshooting and resolving issues, Effective multi-tasking

Certificates

SQL (Basic) Certificate

HackerRank

Project Experience

Hotel management system (individual project)

2025 Mar - 2025 April

- This system simplifies room booking, guest management, and payments, providing a smooth experience for both hotel staff and guests. Users can view room availability, select from various room types (suite, family, double), and specify adults and children during booking. It supports secure online payments and efficient room allocation, enhancing operational efficiency and customer satisfaction.

- React JS, Springboot , MySQL, JWT Token, Rest API, Spring security ,AWS cloud

LINK: [Hotel management system](#)

Import-Export system (Individual project)

- This web-based system facilitates product trade between countries by allowing exporters to add products and manage orders. Importers can browse available products, place orders, and track order statuses. Exporters can confirm orders, initiate shipments, and monitor activity through an interactive dashboard. The system streamlines cross-border transactions and improves communication between importers and exporters
 - React JS, Springboot, MySQL, API Gateway, Rest API, Spring security ,JWT Token
- LINK: [Import-Export system](#)

Event-Tickets booking system (On Going / individual project)

2025 April- present

- A web app for booking tickets to concerts, conferences, DJ nights, and more. Features include event management (admin), ticket booking, booking history, wishlist, and event reviews.
 - React JS, Springboot, MySQL, JWT Token, Rest API, Spring security
- LINK: [Ticket-Booking system](#)

Fuel management system (Group project)

2024 feb - 2024 mar

- Developed a QR-based fuel distribution system during the COVID-19 pandemic to regulate vehicle fuel access. Enabled efficient tracking, weekly updates, and reduced crowding at fuel stations.
 - Springboot, MySQL, HTML, CSS, REST API
- LINK: [Fuel management system](#)

Alcohol shop E-commerce website (Group project)

2024 oct - 2024 nov

- Developed an online platform for browsing and purchasing a variety of alcoholic beverages, improving customer accessibility and streamlining the shopping experience through a user-friendly interface.
 - PHP , MySQL, Javascript, HTML, CSS
- LINK: [Alcohol Sales System](#)

Volunteering Experience

Member of Open-Source Software Community, University of Kelaniya	2024 - Current
Member of Software Engineering Student's Association, University of Kelaniya	2023- 2024
Batch coordinator of the Tamil Student Association, University of Kelaniya	2023 - 2024

Competitions

Real Hack 4.0 , University of Kelaniya	2023 - May
Junior Hack 5.0 , University of Kelaniya	2024 - Aug

Languages

English (work proficiency)
Tamil (native)
